

MOBILE ASSET MANAGEMENT: ACHIEVE HIGHER PRODUCTIVITY THROUGH MOBILITY

Your organisation can no longer think that mobilising your asset management is a thing of the future. It is affecting your bottom line right now and could mean the difference between effectively competing in your industry and lagging behind. The cost-benefit from connecting your asset information to your field crew, at their fingertips, will not only pay for itself through improved productivity but will ultimately deliver a higher return on your capital assets.

REAP THE BENEFITS:

- Greatly reduce paperwork, double handling, data entry and error
- Streamline and integrate work processes
- Enhance scheduling
- Improve compliance and risk management
- Shorten work cycles and improve response times
- Increase work capacity & labour productivity
- Reduce rework
- Reduce maintenance backlog
- Increase planned and decrease unplanned maintenance
- Enhance customer service

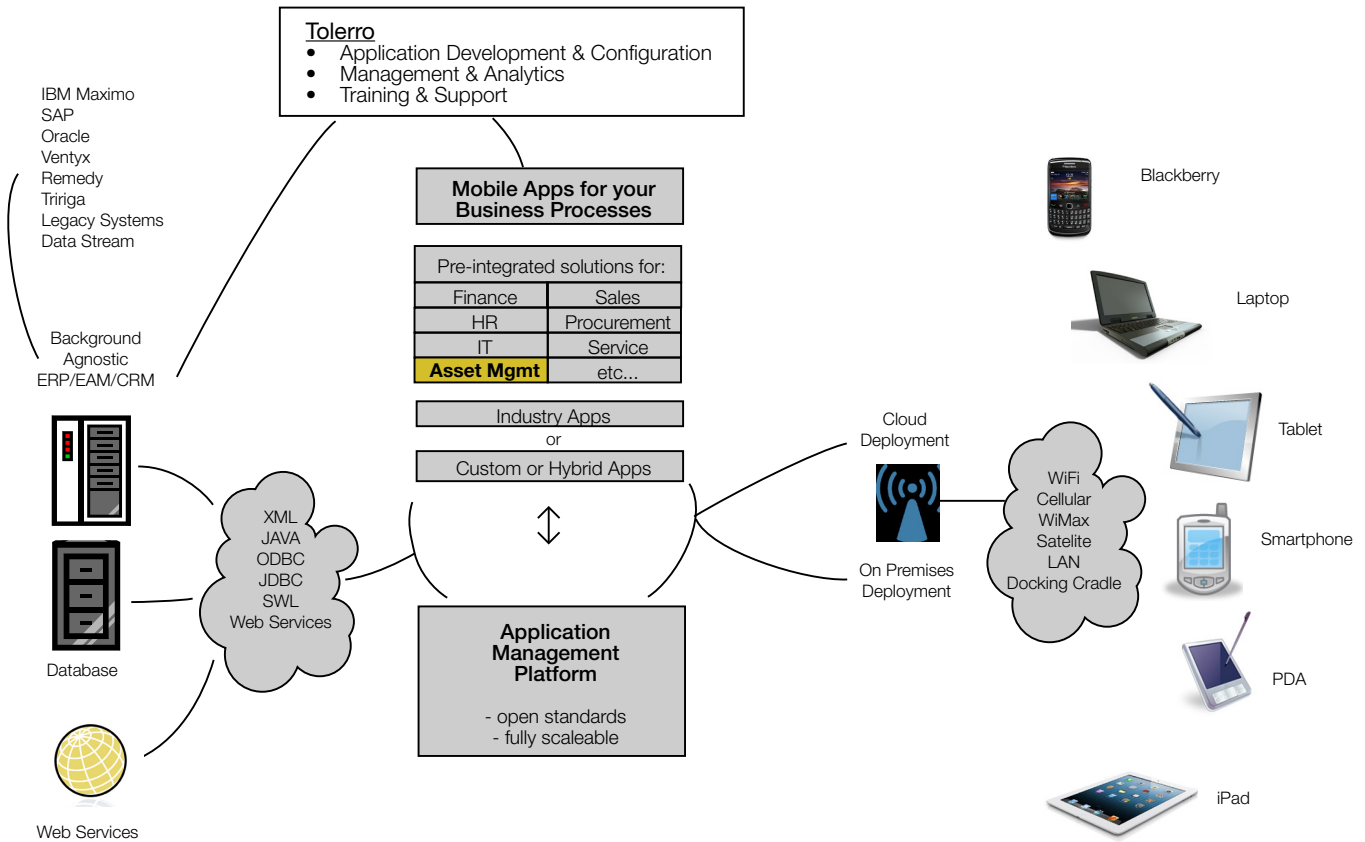

“If you don’t have a mobile strategy, you don’t have a future strategy”
**Eric Schmidt, Executive
Chairman, Google.**

HOW A MOBILE ASSET MANAGEMENT SOLUTION OPERATES

The right mobile asset management solution extends essential parts of your asset management system and work processes out to your field crew using wireless technology, accessible on a mobile device (PDA, iPhone, iPad, laptop, Notebook etc). This means your field crew have immediate access to work orders, routes, locations, equipment lists, checklists, task lists, drawings, validation rules, previous calibrations, inventory levels – or any other information you want to configure from your asset management system. The following diagram outlines an end-to-end mobile solution:

End-to-End Mobile Solution Architecture

STRATEGY FIRST

Before you can select the right mobile asset management solution you need to develop an overarching mobile strategy. As asset management specialists and not just mobilisation experts, Tolerro can assist you to navigate the many considerations required to tailor the right mobilisation strategy, incorporating your asset management objectives and processes. We can provide a complete end-to-end solution or part of a solution. We partner with both IBM and SAP and offer you agnostic and objective advice and options.

**TOLERRO CAN ASSESS, SCOPE, PLAN AND IMPLEMENT YOUR MOBILITY SOLUTION.
